

March 6 1944

Dear Dorothy:

Today I feel very happy - and I want you to know why - and share my joy

yesterday your mother, Mr. Johnson and his wife (Mr. Johnson is the man who took all the pictures that appeared in the Journal and lots of other places) we went to Mr. Gravel and we took some pictures of the Kytton.

Not everything went swell and I am very well pleased with the results - of course, now that the preliminary tests have been successful, there will be much interest come in from the Government who has ordered to keep this secret until they have had a look at it.

Not everything is coming along very good and I know you will be happy with us.

When you do not do well I scold but I can also write good news to you.

I do not believe that we will be allowed to show public pictures so
